RS-485 Matrix

Art.-Nr. TV8473

- Simultaneous connection of two RS485 control devices to one bus line
- Rugged black metal housing

This device allows you to operate several PTZ control devices (such as a PTZ control panel and DVR) on an RS-485 bus cable. At the same time, the data is actively distributed on up to four RS-485 dual-wire lines. This allows cables to be efficiently laid in installations that have PTZ dome cameras distributed across a large area.

Technical Data

DC voltage supply	12V		Min. operating temperature	0°C
Data input	2x RS-485 1x RS-232			
Data output	4x RS-485		Net weight	0.425kg
Height	76mm		Power consumption	350mA
Length	44mm		Power consumption	350W
Max. humidity	95%		Transmission distance	1200m
Max. operating temperature	45°C		Width	133mm
