

Power antenna (5.8 GHz / 16 dB)

Art.-Nr. TVAC17100

- Amplifies the video signal received, thus increasing the range
- For connection to the universal wireless receiver
- Improvement in reception of up to 16 dB
- Protection class IP65

The 2.4 GHz power antenna (TVAC17100) is an accessory for the 5.8 GHz wireless receiver (TV5742). This device can be used both indoors and outdoors. The wireless receiver receives video camera signals from a wireless transmitter at 5.8 GHz high frequency, without the need for a cable. The wireless receiver is supported by the power antenna, which amplifies the signal with 16 dB.

Technical Data

Adjustment	> 10 dBdB
Aperture angle, horizontal	35.5°
Aperture angle, vertical	14.9°
Connections	SMA plug
Gain	16dB
Height	163mm
IP protection class	65

Length	16mm
Max. operating temperature	60°C
Min. operating temperature	-30°C
Net weight	0.63kg
Power consumption	10W
Width	138mm
