- Simple and intuitive operation
- Recording triggered by motion detection, schedule or permanent
- 2 USB interfaces for quick and simple storing of important recordings.
- Detailed high-resolution analogue recording in real time
- Mobile access using the ABUS iDVR app

Video surveillance made easy

This video surveillance kit with a 4-channel recorder and built-in 500 GB hard drive, a day/night outdoor camera, universal power supply unit and coaxial cable provides video monitoring that is easy to install and operate, and can be used both indoors and outdoors.

State-of-the-art recording technology

The compact digital camera with H.264 compression and a VGA output provides 4 channels for recordings at up to 25 frames per second (real time) and 5 different resolutions (max. 960 x 576 pixels). The video images are stored in excellent quality, take up very little space on the hard drive (the recorder has a built-in 500 GB hard drive) and are optimised for fast network access. Depending on the setting, recording is started manually, according to a schedule, or by motion sensor. The kit also includes: IR camera with 600 TV lines and 3.6 mm fixed lens (angle of view: 68°) with integrated IR LEDs for day/night operation outdoors (IP66).

Fast and simple installation

Fast and easy installation is guaranteed with the 20 m combination cable and power supply unit provided.
