

# Video Surveillance Kit: Digital Recorder + 4 Outdoor Dome Cameras

Art.-Nr. TVVR30414

- Set: 4-channel recorder, 4 x day/night vision outdoor dome cameras, universal power supply unit and 4 x 20 m coaxial cable
- Varied camera installation options - whether indoors or outdoors
- Simple design and high protection class (IP66)
- Internet and mobile access to live pictures and recordings
- 500 GB capacity for approx. 5 weeks' "Non-Stop" recording included
- Simple and intuitive operation
- Recording triggered by motion detection, schedule or permanent
- 2 USB interfaces for quick and simple storing of important recordings
- Detailed high-resolution analogue recording in real time
- Mobile access using the ABUS iDVR app

## Simple installation – professional video surveillance

This entry-level package includes all the necessary components for installing a professional video surveillance system: a compact digital recorder with a built-in 500 GB hard drive with 4 camera inputs, H.264 compression and VGA output, four day/night outdoor dome cameras and plug-and-play accessories (combination video cable, 12 V power supply unit with 5-way distributor).

## State-of-the-art recording technology combined with intuitive operation

The compact DVR provides four channels for recording at up to 25 images/sec (real time) and 960H resolution (max. 960 x 480 pixels). Using H.264 compression, the video images are stored in excellent quality, take up very little memory on the hard drive and are optimised for fast network access. Depending on the setting, recording is started manually, according to a schedule, or through motion detection. The kit contains day/night outdoor dome cameras with 600 TV lines and a 3.6 mm fixed lens (angle of view: 68°) for efficient monitoring indoors or outdoors to prevent vandalism and tampering.

## Simple mounting indoors or outdoors

The kit includes 4 IR cameras with 600 TV lines and a 3.6 mm fixed lens (angle of view: 68.4°) with integrated IR
